Data Analysis

PMP®

A PMP®-certified project management professional with hands-on experience in data analysis and building interactive dashboards using Excel and Power BI. I translate raw data into clear KPIs and visuals that support decision-making across industries — from finance to energy and retail.

My work sits at the intersection of structured project delivery and rigorous data analysis: I plan, track, and report on initiatives the same way I model and visualize data — with clarity, accuracy, and a bias toward decisions that hold up under scrutiny.

Why Excel & Power BI

Excel offers speed and flexibility for preparing data and building analytical models, while Power BI adds an interactive, visual layer that makes exploring data and acting on insight intuitive. Together they form a complete pipeline — from cleaning and preparation to visualization and analysis — supporting confident business decisions with minimal effort and maximum clarity.
